MOTOR CARS FOR BUDAPEST SUBWAY

Engineers of the Gyor Wagon Factory have prepared blueprints for two experimental motor cars which are to be tested on the Budapest subway. The cars will be similar to those used on the Moscow Metro, and work on the parts has already begun.

The motor car wheels are being made at Pongyos; piping, at the Matyas Rakosi Works; metal sheathing, at the Kobanya Aluminum Rolling Mills; internal installations, at the Veneer and Plate Works; and the electric motor, at the Ganz Electrical Works.

In July, the Ganz Wagon Factory, which is in charge of casting certain parts, will assemble the motor cars. They will be put in operation later this year to determine which type should be adopted for permanent use on the Budapest subway.
